

Home

What needs attention right now, shortcuts, and this week's numbers

What this page is for

Home is the first screen after sign-in. It answers one question: **what needs someone's attention right now?** It watches every other page and lists anything that's stuck, unsaved or waiting on MAO, so nobody has to tap through every page to find out.

Before you start

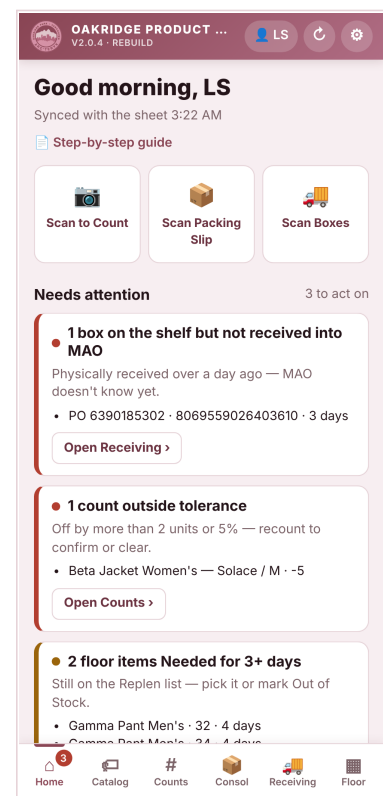

Signed in (see the Getting Started guide).

1

Check how fresh the numbers are

Under the greeting, **"Synced with the sheet"** shows when the app last pulled everything from the Google Sheet.

If it's old, or a lead has just pasted something new into the sheet, tap  in the top bar.

2

Use a shortcut

Scan to Count opens Counts with the camera ready. **Scan Packing Slip** opens Consolidations ready to close a box. **Scan Boxes** opens Receiving in continuous box-scanning mode.

3

Work through “Needs attention”

Each card is one thing that needs doing, with a button that takes you straight to the right page.

Red means act now, **amber** means soon, and **grey** cards are just notes (e.g. something staged on this device but not sent yet). A card disappears by itself once the problem is fixed. There's nothing to dismiss.

When there's nothing left you'll see **“All clear.”**

1 box on the shelf but not received into MAO

Physically received over a day ago — MAO doesn't know yet.

- PO 6390185302 · 8069559026403610 · 3 days

[Open Receiving >](#)

1 count outside tolerance

Off by more than 2 units or 5% — recount to confirm or clear.

- Beta Jacket Women's — Solace / M · -5

[Open Counts >](#)

2 floor items Needed for 3+ days

Still on the Replen list — pick it or mark Out of Stock.

- Gamma Pant Men's · 32 · 4 days
- Gamma Pant Men's · 34 · 4 days

[Open Replen >](#)

4

Glance at this week's numbers

Count accuracy: the share of this week's counts that were within tolerance. **Open consolidation lines:** items on HQ's list not yet processed. **Boxes received:** boxes physically received this week. **86 Board:** items currently out of stock.

Tap any tile to open that page. The week starts on Monday.

Watch the badge

The red number on the **Home** button in the bottom bar is how many red and amber cards are waiting, so you can see it from any page. Grey notes aren't counted.

What can appear on Home, and how to clear it

Card	Why it appears	How it clears
Box on the shelf but not received into MAO	A box was marked Physically Received over a day ago, but not Received into MAO.	Receive it in MAO, then mark it Received into MAO on the Receiving page.
Count outside tolerance	The latest count of a product (last 14 days) was off by more than 2 units or 5%, whichever is larger.	Recount it on Counts. A recount within tolerance clears it.
Counts not saved to the sheet	Counts logged on this device haven't been sent yet.	Counts → Save to Sheet .
Consolidation items waiting in Holding	Items were marked Actioned but Update wasn't tapped. Turns amber after a day.	Consolidations → Update Sheet .
Consolidation adjustment unresolved	An old "Needs Adjustment" entry from the original app.	Consolidations → Activity → Resolve .
Floor item Needed for 3+ days	A size has sat on the Replen list for 3 or more days.	Floor Stock → Replen → Picked or Out of stock .
Staged in Receiving / Check Floor / Replen	Decisions held on this device only.	Tap the update button on that page.
The sheet rejected this device's access key	The key is wrong or has changed.	⚙ Settings → paste the current key.
Data may be out of date	No full sync in the last 24 hours.	Tap ↻ when connected.
