

Consolidations

Pull HQ's consolidation list, track counts, and log closed boxes

What this page is for

Working through HQ's consolidation list: tracking how many of each item you've pulled, marking lines done, and recording who closed each box and when.

Before you start

A lead pastes HQ's list into the **ConsolMaster** tab of the Google Sheet. Tap **u** in the top bar to load a new list. The full process is in the **Consolidations Guide** linked at the top of the page.

1 Find the items to consolidate

Each line is one item on HQ's list: name, color, style and destination, with your **pulled count** against the **total** HQ wants.

Use the filter box above the list to narrow it by name, style, color or destination.

Atom SL Hoody Men's

Void · X000009560 · to Toronto DC

– 0 + / 3

Actioned

Cerium Hoody Men's

– 0 + / 2

Actioned

Gamma Pant Men's

Black · X000006700 · to Toronto DC

– 2 + / 4

Actioned

2 Track what you've pulled

Tap + / – as you pull pieces, or type the number. Each change saves to the sheet **immediately**, so everyone sees the same running count.

The line turns green once you've reached the total.

3

Mark a line Actioned

When a line is done, tap **Actioned**. It moves out of the list into **Holding**, where it waits until you tap **Update Sheet**. Changed your mind? Tap **Remove** in Holding to put it back.

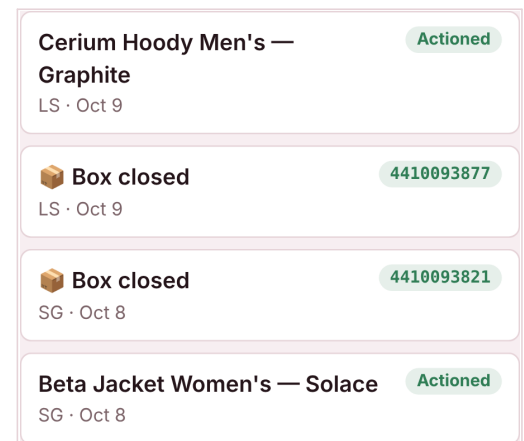

4

Update the sheet

Tap **Update Sheet** to send everything in Holding at once. Each line is marked **Processed** on HQ's list and logged in Activity with your initials.

If it can't reach the sheet, the items stay in Holding. Try again when you're connected.

Tip: Lines left in Holding show up on Home, and turn amber after a day, so nothing gets forgotten.

5

Close a box

When a box is sealed, tap **Scan Packing Slip** and scan the slip's barcode. If it won't scan, type the reference number and tap **Close Box**.

This only records the reference number, who closed it and when. The box's contents are looked up in MAO by that number.

Close a box

Scan the packing slip when a box is sealed — logs who closed it and when.

Scan Packing Slip

...or type the reference #

Close Box

6

Confirm it's closed in MAO

A reminder appears every time: **this app can't see MAO**. Close the box in MAO first, then tap **It's closed in MAO, log it**.

Close it in MAO too

Box **4410093877** will be logged as closed here.

This app can't see MAO. Make sure the box is closed in MAO as well.

It's closed in MAO, log it

7

Check it was logged

A green message confirms the box was closed and logged. It also appears at the top of **Activity**. **CSV** downloads the full consolidation log.
