

Receiving

Import shipments, scan boxes in, and make sure MAO gets updated

What this page is for

Logging incoming boxes in two separate steps: **Physically Received** (it's on our shelf) and **Received into MAO** (MAO knows about it). Each step is stamped with who did it and when. Boxes that are on the shelf but not yet in MAO stay visible until they are.

Before you start

The expected-shipment list from MAO's **Receive Inventory** page (step 1).

1 Import the expected shipments

Open **Import from MAO** at the bottom of the page. In MAO's **Receive Inventory** page, copy the shipment list (the ETA / Package / PO # blocks) and paste it in.

Tap **Import**. The boxes appear under **Expected boxes** and are shared with every device. Re-importing the same list is safe.

▼ Import from MAO

Paste from MAO's *Receive Inventory* page (ETA / Package / PO # lines).

```
PO # 6390185311
ETA: 10-10-2026
Package 8069559026403621
Origin 9120
Receipt Type Package
For Store Inventory
Carrier UPS
PO # 6390185311
```

2 Scan boxes as they come in

Tap **Scan Boxes**. The camera stays open, so scan each box's package barcode one after another. Each one goes into **Holding** and the count updates on screen.

Tap **Done Scanning** when you're finished.

Scanning boxes...

Held 8069559026403612 (PO 6390185303). 2 boxes held.

3

A box that isn't on the list

If a scanned box wasn't in the import, the camera stops and asks for its **PO #**. Enter it and tap **Add & hold**. The box is added to the shared list and held, ready to mark.

4

Mark them Physically Received

With the boxes in **Holding**, tap **Physically Received**. They're stamped with today's date and your initials.

Tap **Remove** to take a box back out of Holding before marking.

Watch "Waiting on MAO"

Boxes that are on the shelf but **not yet received into MAO** are listed here, each showing how long it has been waiting.

After a day, a box also shows up as a red card on Home. This is the step that's easy to forget, and it's what this list is for.

Waiting on MAO 3

Hold all

On the shelf, but the sheet doesn't show them received into MAO yet. Receive them in MAO, then hold and mark them here.

Receive them into MAO

Receive the boxes in MAO first. Then tap **Hold all** on Waiting on MAO (or scan just the boxes you did) and tap **Received into MAO**.

Those boxes are finished: they drop off every list, and the Home card clears.

No camera? Tick boxes instead

Under **Expected boxes**, tick the boxes and tap **Hold selected**. Then mark them as in steps 4 and 6. Use the filter to find a PO # or package number quickly.

Export CSV (inside Import from MAO) downloads the full receiving log.
