

Floor Stock

Check the floor after sales, pick replen, and run the 86 Board

What this page is for

Keeping the floor stocked after things sell, in three tabs that follow one item from start to finish: **Check Floor** (what sold, and is it needed?) → **Replen** (pick it from the back) → **86 Board** (we're out, and that's been noted).

Before you start

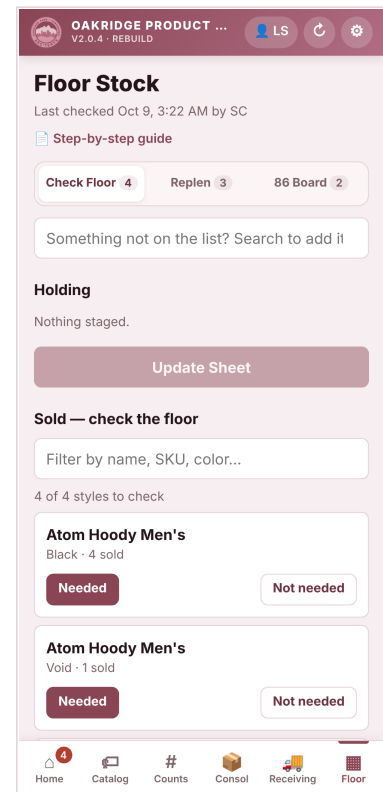

A lead pastes MAO's **Items Sold** export (columns A-H) into the **FloorRestock** tab of the sheet. Tap  to load it. Accessories (gender "U") are left out automatically, since they're restocked from the floor.

1

Open Check Floor

Tap **Floor** in the bottom bar, then the **Check Floor** tab. The numbers on the tabs show how much is waiting in each.

The line under the title shows when the floor was last checked, and by whom.

2

One line per style and color

Sold items are grouped into **one line per style + color**, whatever size sold. For example, Black Atom Hoodies sold in S, M and L show as one **Atom Hoody Men's · Black · 4 sold** line.

Go to that style on the floor and see for yourself which sizes are missing.

Atom Hoody Men's Black · 4 sold	Needed	Not needed
Atom Hoody Men's Void · 1 sold	Needed	Not needed
Beta Jacket Women's Solace · 1 sold	Needed	Not needed
Cormac Tee Men's White · 2 sold	Needed	Not needed

3

Needed? Pick the sizes

If the floor needs restocking, tap **Needed** and pick the sizes that are missing, or **Other (any size)** if any size will do. Then tap **Stage as Needed**.

If the floor is fine, tap **Not needed**.

Tip: Only the sizes you pick go to Replen. The sizes that sold don't matter. What matters is what you saw missing.

Which sizes are needed?
Atom Hoody Men's — Black

S	M	L	30
32	34	2	4
6	Other (any size)		
Stage as Needed		Cancel	

4

Update the sheet

Your decisions wait in **Holding** (tap **Remove** to undo one). Tap **Update Sheet** to send them all.

The sizes you picked appear on the **Replen** tab for whoever is picking in the back.

Something needs restocking but isn't on the list

Type it into “**Something not on the list?**” at the top. If it's in the catalog, tap **Add** on the result and it joins the Check Floor list.

Not in the catalog at all? Tap **Not in the catalog? Add “...” by hand**, pick the sizes and tap **Add as Needed**. It's staged as Needed, ready for Update.

32 **34** **2** **4**

6 **Other**

Add as Needed **Cancel**

6

Pick on the Replen tab

Replen lists each style and color once, with the **needed sizes** underneath. For each size, tap **Picked** once it's on the floor, or **Out of stock** if there's none in the back.

An amber **needed ... days** note means it has been waiting 3 or more days. It's also flagged on Home.

Atom Hoody Men's

34	Picked	Out of stock

7

Update Replen

Picks wait in Holding until you tap **Update Sheet**. Anything marked **Out of stock** goes onto the **86 Board**.

8

Run the 86 Board

The 86 Board lists everything that's out, newest first, so the floor team can see it without calling the back.

When stock comes back, tap **Restocked**. It saves straight away and the item drops off the board.

Reading the progress bar

Lines on Replen and the 86 Board carry a small three-step bar: **Needed** → **Picked** / **Out of stock** → **Restocked**. A red middle segment means the item went out of stock. A green label means it's finished.
